California Gas Prices Were As Much As \$2.60 greater than US Gas Prices — Despite Taxes and Environmental Rules Adding Only About 69 cents Per Gallon

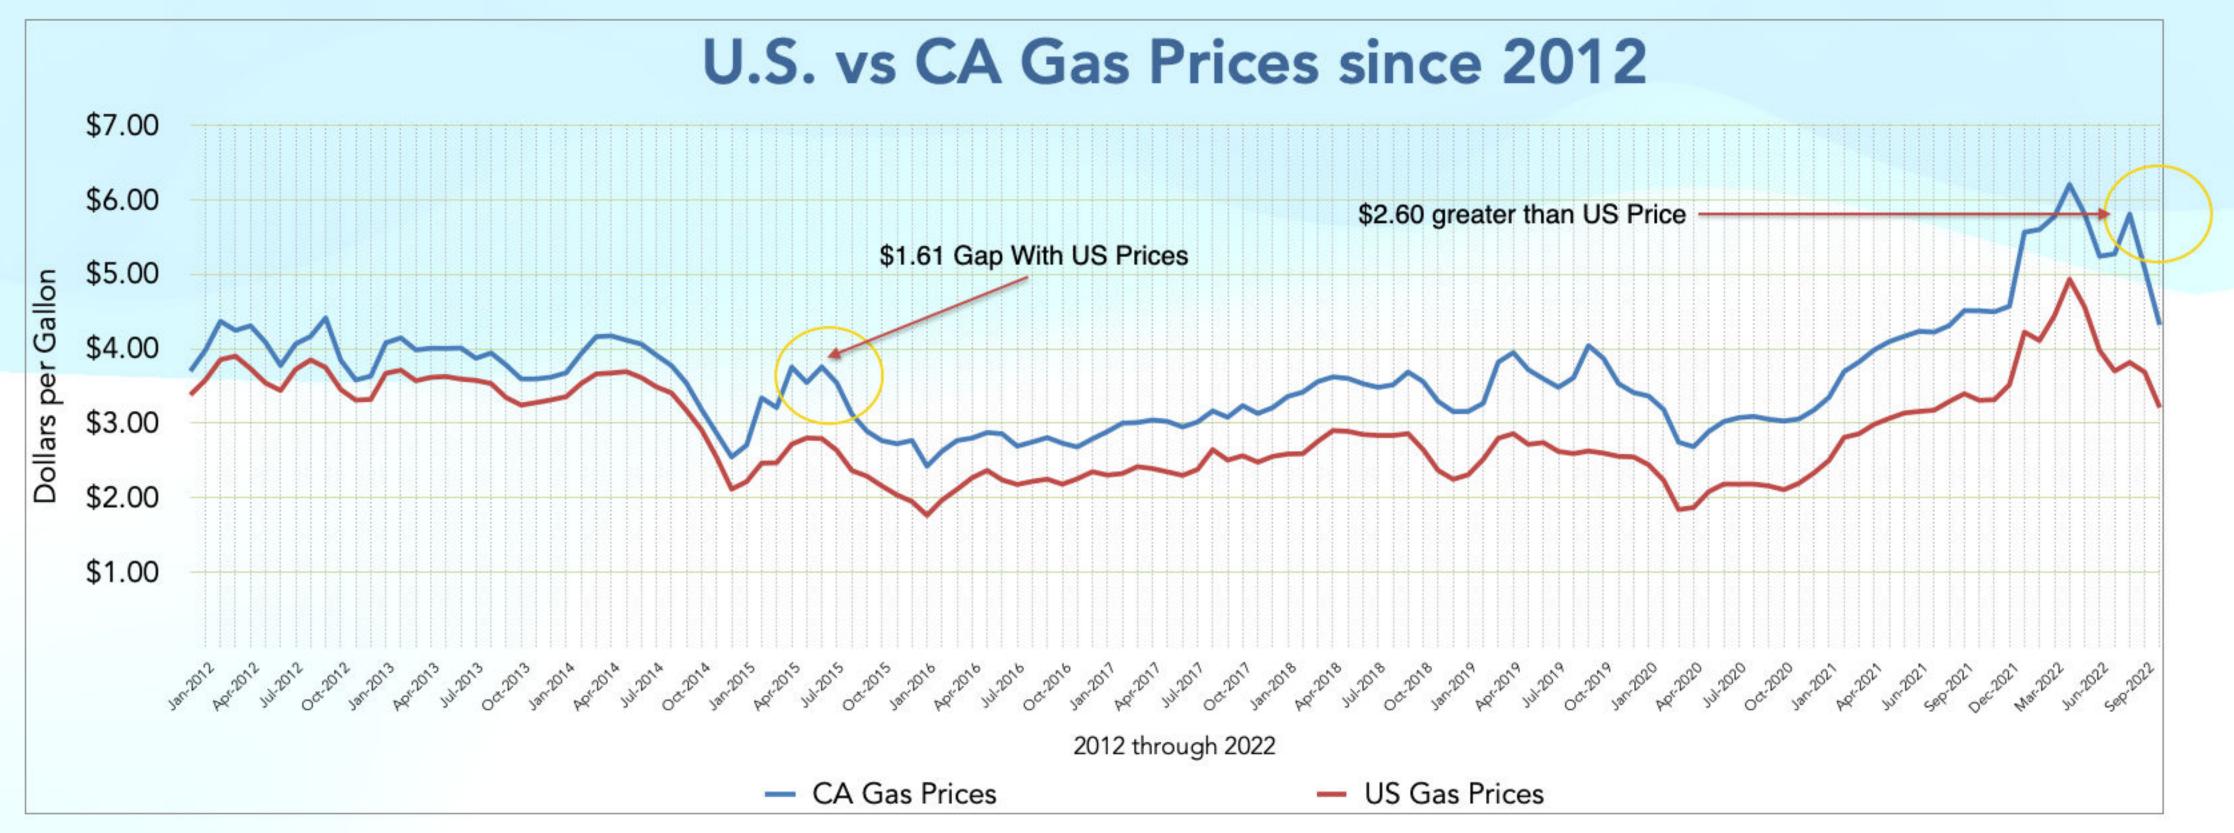

| | Jan | Feb | Mar | Apr | Мау | Jun | Jul | Aug | Sep | October |
|--------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|---------|
| U.S. Price/Gal avg | 3.413 | 3.611 | 4.322 | 4.213 | 4.545 | 5.032 | 4.668 | 4.087 | 3.817 | 3.935 |
| CA Price/Gal avg | 4.584 | 4.660 | 5.655 | 5.692 | 5.871 | 6.294 | 5.897 | 5.333 | 5.375 | 5.905 |

US Gas Prices vs. CA Gas Prices 2022

Added CA Costs From Environmental Regulation And Taxes

Added state taxes = 25 cents (Average state tax is 29 cents/ CA taxes are 54 cents) Low carbon fuel standard = 16 cents Cap and trade = 26 cents Underground storage = 2 cents Difference = 69 cents

Since 2015, California gasoline prices have consistently been about \$1 more per gallon more than US gasoline but reached an all-time high of \$2.60 more in October. Previously, the greatest delta with US gas prices was \$1.61 more following the Exxon Torrance refinery explosion in 2015.

When Gas Prices Spike, Low Income Workers Feel It The Most

- At \$4 per gallon, 9% of an annual minimum wage salary is spent on gas.
- At \$5 per gallon, 11% of an annual minimum wage salary is spent on gas.
- At \$6 per gallon, 13% of an annual minimum wage salary is spent on gas.

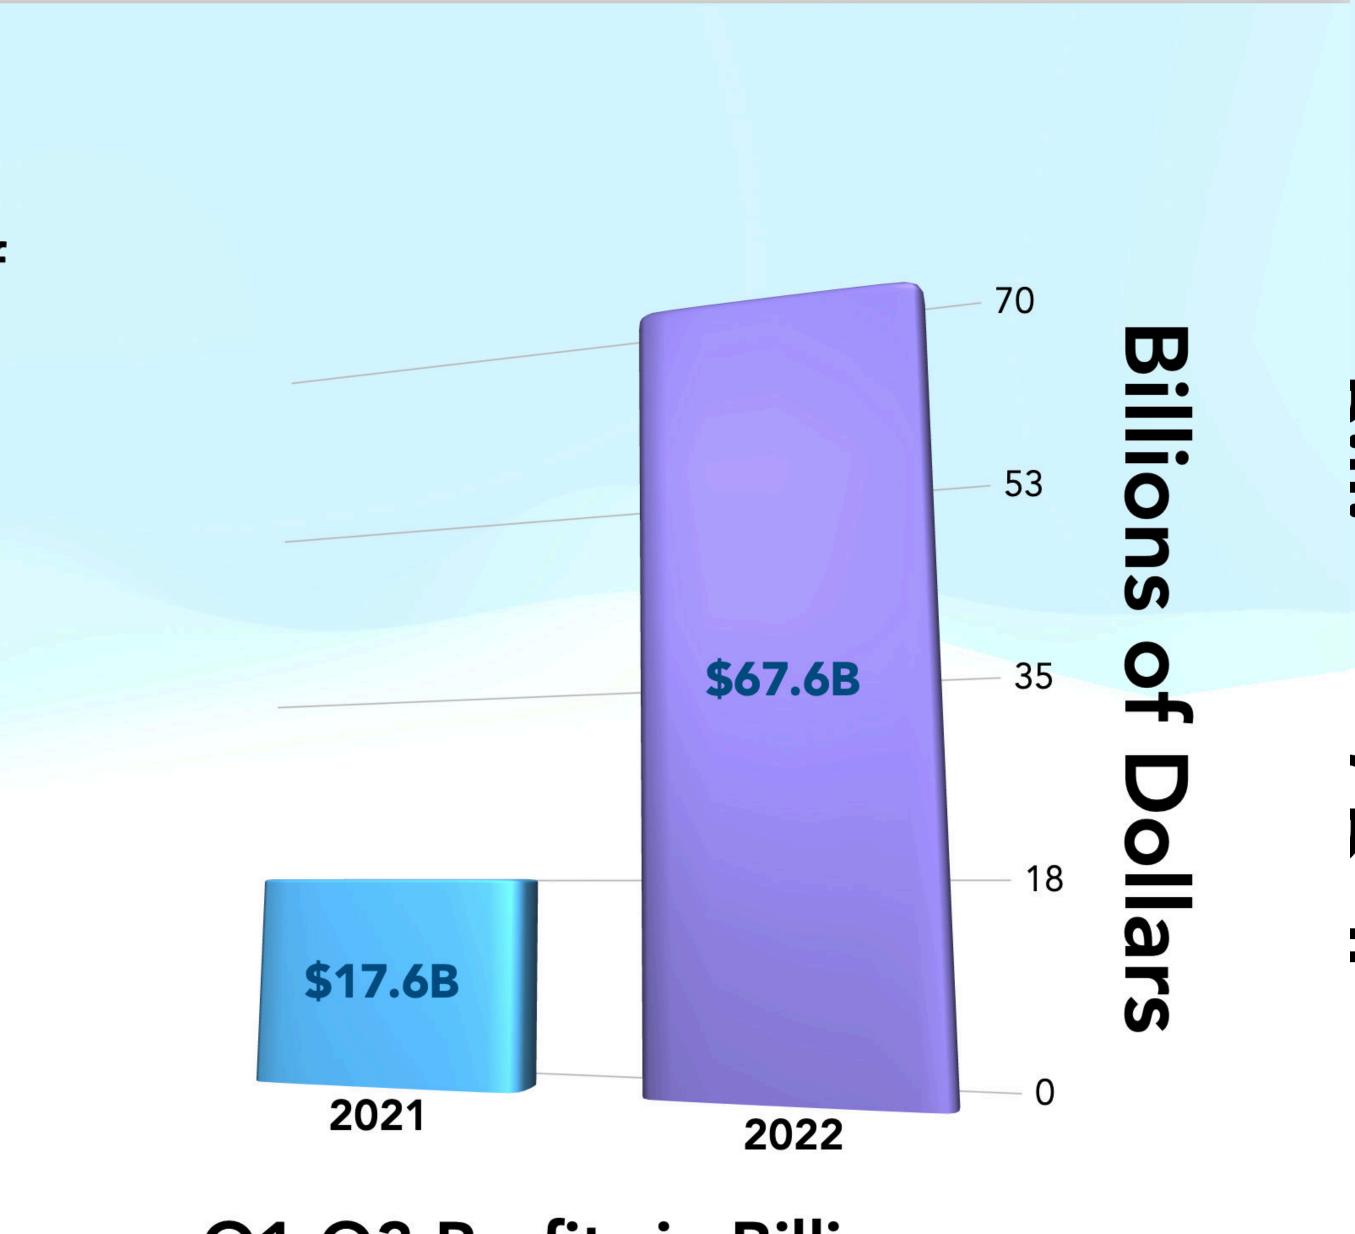

state and federal taxes.

*—The average CA driver drives 14,434 miles a year (Car and Driver). That equals 577 gallons of gas per year. The average CA minimum wage worker makes \$26,512 after

Big 5 oil refiners posted profits of \$67.6 billion in the first nine months of 2022 — nearly quadruple the \$17.6 billion posted for the same period in 2021.

Major car insurers say they won't leave California

4I think the issue is not whether the insurance companies leave the state but whether we throw them out.

- Prop. 103 co-author Harvey Rosenfield

By Ed Pope

Mercury News Consumer Writes Eight of the 10 largest auto insurers in California said Tuesday they have no intention of abandoning the \$12 billion California market despite a Supreme Court ruling that has cleared the way for disgruntled firms to pull out.

In fact, several executives said the ruling could enhance competition in the Golden State, because it will make it easier for firms to come and go.

The eight who said they will stay insure more than 8 million automobiles, two-thirds of the insured passenger vehicles in the state.

"We're not leaving the state," said Jerry Clemans, a spokesman for the Farmers Insurance Group, the state's second-largest. "We've been here over 60 years, and we intend to stay."

Added Thomas R. Brown, chairman of the board of California Casualty, "Any company that has a significant market share in California will not choose to leave. They'll do their best to find a way to survive."

But Joe Annotti, executive director of Independent Insurance Agents and Brokers of California, said that while he does not expect "a stampede to the exits," the insurance climate in California will. not get better until "we get nofault insurance or fast-track arbitration, more auto-safety measures and tougher anti-fraud provisions."

Other companies who said they are staying included State Farm - which, with 3 million policies, is by far the largest; California State Automobile Association: 20th Century. Mid-Century (a Farmers subsidiary); Mercury Casualty; and and has not decided whether to out," Rosenfield said State Farm Fire & Casualty (a sub- appeal.

• •

.

sidiary). Allstate and USAA insurance companies could not be reached for comment.

Some - such as CSAA, Mercury and California Casualty - have little choice but to stay, since virtually all their business is in Califormia

On Monday, the state Supreme Court delivered a victory to the industry, ruling in a case involving several Travelers subsidiaries that insurers may withdraw from the state. The decision was part of the continuing legal battle over the rate-cutting Proposition 103, passed by voters in November 1988.

The state Department of Insurance had said Travelers could not pull out without providing continuous coverage for its policyholders, and Travelers sued.

The immediate impact of the decision is minuscule because the Travelers group - which includes four companies - has only 18,000 policyholders. Only two other com-panies, Central Mutual Insurance Co. and a subsidiary, have asked to withdraw from the state. Together, they have fewer than 3,000 auto policyholders.

The Department of Insurance said that 90 percent of those dumped by the two groups will be able to get hisurance with the company of their choice under a provision of Proposition 103 that guarantees coverage to good drivers (no more than one moving viclation in the past three years).

Currently, more than 400 companies in the state offer auto insurance.

James Holmes, an attorney for the department, said Insurance issioner Roxani Gillespie is

.

But, contrary to initial interpretations, the Supreme Court ruling requires companies leaving the state to find another insurer to take over their policies, Holmes said. However, the company that accepts the policies does not have to renew them when they expire.

The ruling emphasized that companies that withdraw "burn their bridges." according to Holmes, and cannot write other lines of insurance in the state. The effect of that ruling may be moot because most large insurance firms have several subsidiaries in California and those subsidiaries can continue to write other lines, such as homeowners, health, life and the like.

Not everyone was sanguine about the decision......

Jack Murgia, Northern California spokesman for Voter Revolt, the consumer group that put Proposition 103 on the ballot, said the court "just handed the industry a very big club. Giving them the power to cancel any line (of coverage) gives them a lot of room to maneuver."

He said the test will come when the department finishes drawing up rules for future rate regulation and the companies have hearings on their individual rate plans.

"That's when they can pull out the club," Murgia said.

Harvey Rosenfield, co-author of Proposition 103, said the issue soon may be even more cut and dried. His group will try to put a constitutional amendment on the ballot that would create an auto insurance monopoly run by the state.

"I think the issue is not whether the insurance companies leave still studying the lengthy ruling state but whether we throw them

"The multi-billion dollar California insurance" market is the world's largest. As long as the economics remain lucrative, insurers of one company or another will remain to enjoy them."

SAN DIEGO TRIBUNE

WEDNESDAY, JANUARY 31, 1990

Empty threats are bad policy

THE STATE Supreme Court on Monday affirmed the right of insurers to abandon California without providing policyholders with renewable backup coverage. It was a major victory for an industry that likes to use such Draconian threats to keep reformers chastened. But even with the court's approval, the industry isn't likely to decamp, leaving California motorists uncovered. The court ruling is after 103's passage in 1988. Anticipating that possimore symbol than substance.

Proposition 103 to hold a reluctant industry hostage, money still can. Big money. The multibilliondollar California insurance market is the world's largest. As long as the economics remain lucrative, insurers of one company or another will remain to vate industry. enjoy them.

economically attractive without gouging consumers. Just where to strike that balance is the company to insure them. There is no reason to subject of continuing hearings by Roxani Gillespie, state insurance commissioner. The new ruling is form process remains fair to insurers and conlikely to have an impact on her deliberations.

return" for an industry accustomed to setting its not be missed.

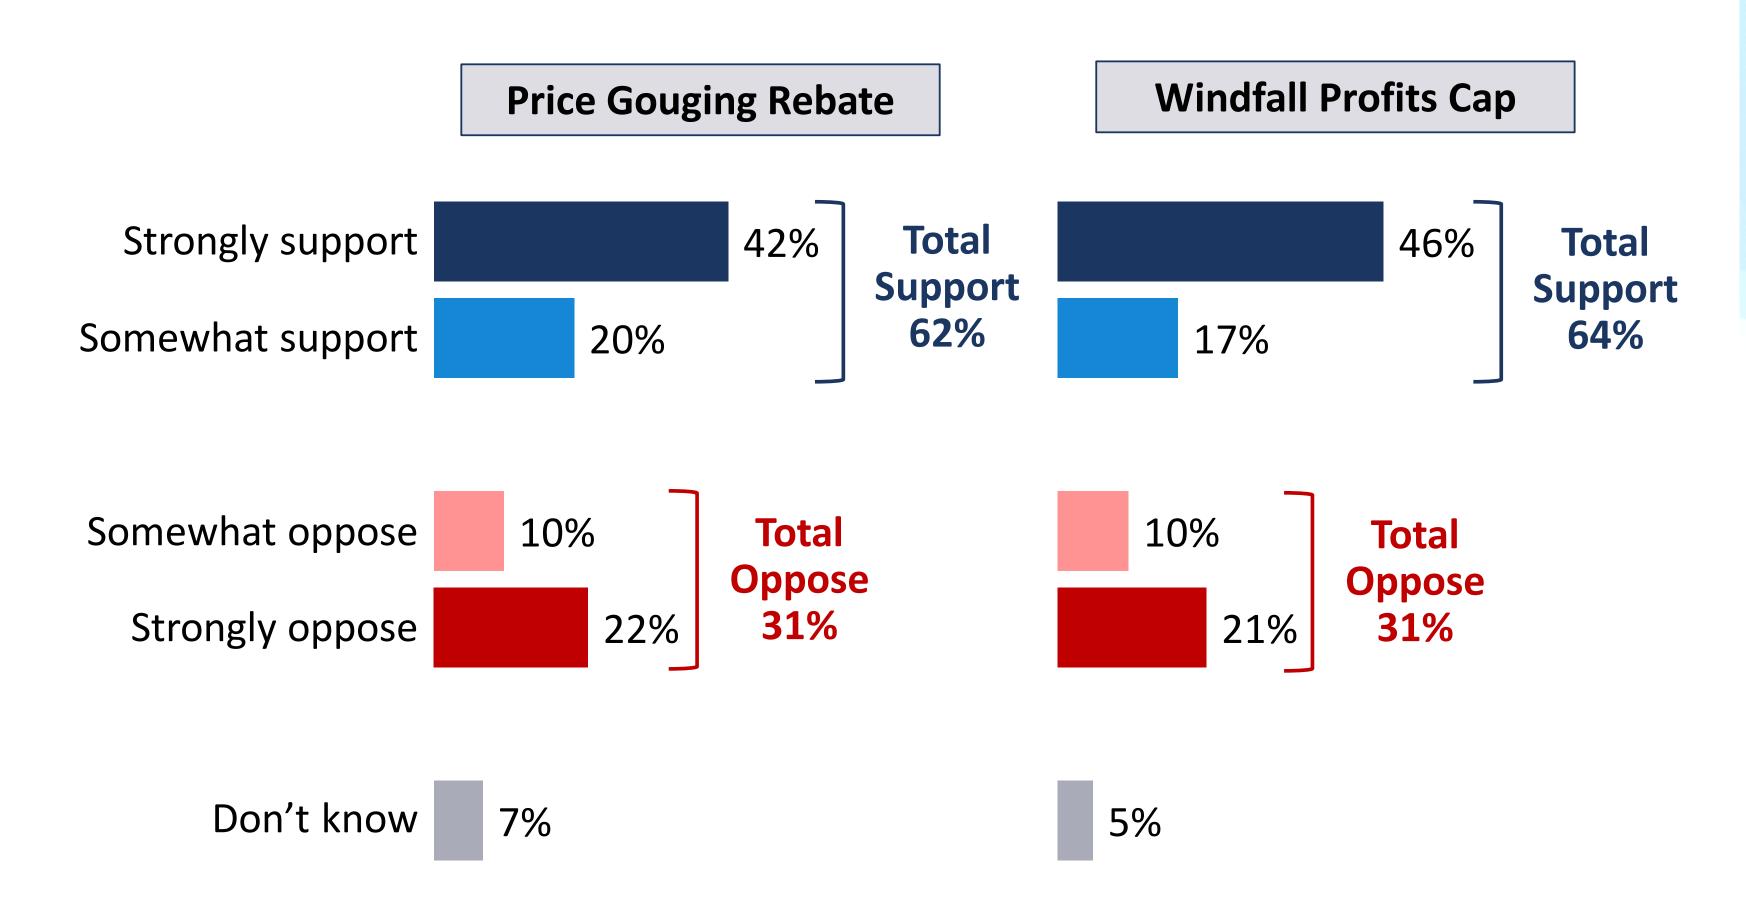

own prices. Emboldened by the court's decision, insurers likely will return to the bargaining process intent on leveraging movement their way. But the commissioner and consumer groups involved in the process must not be bullied.
