DEMOS

This question is about behaviour on the internet, social media and messaging services that can be harmful but is not always illegal. Examples are cyberbullying and trolling, making offensive comments and using the internet to spread false information. How much responsibility, if any, do you think the following groups have to prevent harmful (but not necessarily illegal) activity online? -Individual internet users

Base: Nationally representative sample of 2019 adults interviewed online 22 June 2020 - 29 June 2020. Data are weighted to the profile of the population.

	Weighted 2019	Unweighted 2019	Total % 100%	Gender		Age				Region			Region

DEMOS

These questions are about children accessing things on the internet, social media and messaging services that are inappropriate for their age.

Examples vary depending on the age of the child, but might include social media platforms, gambling sites, or films and videos with adult content.

How much responsibility, if any, do you think the following groups have to prevent children accessing things on the internet that are inappropriate for their age? - Private messaging services (e.g. WhatsApp, Facebook Messenger, Snapchat, Instagram, Gmail)

Base: Nationally representative sample of 2019 adults interviewed online 22 June 2020 - 29 June 2020. Data are weighted to the profile of the population.

DEMOS

Some people argue websites such as social media sites should be blocked from public access if, after being warned, they refuse to take steps to stop harmful or illegal content from being posted on forums they host. Other people argue it would be unfair to block an entire website because harmful or illegal content is posted on one forum, if other forums they host are not used for harmful or illegal activity.

Would you support or oppose blocking an entire website, such as a social media site, if, after repeated warnings, they failed to take steps to stop the following being posted on forums they host?- Serious illegal activity such as terrorism related activity or picture of child abuse

Some people argue websites such as social media sites should be blocked from public access if, after being warned, they refuse to take steps to stop harmful or illegal content from being posted on forums they host. Other people argue it would be unfair to block an entire website because harmful or illegal content is posted on one forum, if other forums they host are not used for harmful or illegal activity.

Would you support or oppose blocking an entire website, such as a social media site, if, after repeated warnings, they failed to take steps to stop the following being posted on forums they host?- Harmful activity such as cyberbullying, trolling, or spreading harmful false information

Base: Nationally representative sample of 2019 adults interviewed online 22 June 2020 - 29 June 2020. Data are weighted to the profile of the population.
