# Availability of ELI/XML serialisation (June 2017)

An encoding of ELI metadata in an XML schema (XSD) has been published by the ELI Taskforce. It's available for reuse and provided with a set of XML transformations to generate ELI in RDF/XML, RDFa header or HTML+RDFa. This encoding is made available to facilitate the integration of ELI in XML-based document workflows. It can be used stand-alone or imported into other XML documents. If you have any questions on the ELI/XML serialisation you can contact us at: [OP-ELI-MAILBOX@publications.europa.eu](mailto:OP-ELI-MAILBOX@publications.europa.eu)
