EXECUTIVE  
SUMMARY

State of Loyalty.

# A Decade of Loyalty.

In its 10th year of publication, The Loyalty Report is proudly known as the leading source of insights and guidance into an ever-evolving world of customer engagement and loyalty—and the launch of this year’s report couldn’t be more timely. In the midst of a global pandemic and economic slowdown, the challenges facing Brands in 2020 have never been more complex. The urgencies for digital transformation, complete with empathy and focus on human needs and experiences, are heightened. The opportunities for Loyalty Programs to help Brands accelerate recovery are very real and present.

While savings have grown more important in light of recent events, so has the value of great service, time, and added convenience, along with the feelings of security that strong Brands engender. New customer expectations, preferences, and behaviors are normalizing. Traditional loyalty mechanics like points, discounts, and rewards are table stakes. To stand out and earn loyalty that sticks, Brands now must focus on true drivers of Member Engagement—and that starts with a foundation of Personal Relevance to the Member, extended through the interconnectivity and influence of digital and human experiences within your program.

In partnership with Visa, Bond surveyed almost 70,000 consumers on more than 100 attributes that examine over 1,000 Loyalty and Credit Card Programs across 34 global markets. This decennial edition of The Loyalty Report shares several of the most important lessons learned for Brands charting their path towards the “new normal.” How will your program stay relevant with the changing State of Loyalty?

## 2020 Chapter Highlights

### 01. Key Program Performance Measures and Drivers of Engagement

By examining key attitudinal and behavioral performance measures, for both Loyalty and Credit Card Programs, our study showcases the importance of Loyalty in strengthening relationships between Brands and their customers. We outline why marketers, in addition to building balanced programs that are competitive on value proposition, must differentiate on Member experience—a crucial factor in driving Member Engagement, being one of the “active” programs in a Member’s loyalty wallet, and avoiding disruption from competitive programs.

#### A barometer for marketers

Member satisfaction echoes their outlook on life.

Follow the Member sentiment in your region to evaluate performance on expectations.

## COVID-19—Loyalty in a Time of Crisis

In 2020, the COVID-19 pandemic has changed the way we live on a global scale. Our [recent series of research studies](#) have been integrated to provide data-driven insights. Bond is able to point out the impact of this global health crisis when it comes to consumer behaviors overall and within customer Loyalty Programs—and we reveal how Brands should continue to operate these programs.

### 02. Path to Engagement

Bond has leveraged a neural network analytical method to create a Loyalty Path Analysis. New to this study, this research approach proves that Personal Relevance is a foundational element to establishing successful Loyalty Programs. We lay out a recommended roadmap for Program operators by showing both the strength and direction of interconnectivity across a set of Member Engagement drivers.

#### The path to Member Engagement

Bond's neural network assessment identifies the strength and direction of interconnectivity among the fundamental aspects of each driver of Member Engagement. The Path Analysis prioritizes the most actionable program levers right through to key business outcomes—revealing that success starts with Personal Relevance carried through the entire loyalty strategy.

### 03. Digital Interactions

Bond shares insights and examples to specify how clients/partners can more effectively utilize digital communications and interactions to deliver Personal Relevance to Members. This includes isolating the touch points, sector by sector, that hold high importance and value in improving personalization within the Member Lifecycle—which ranges from onboarding and activation all the way through to attrition. Analysis includes a deep dive into the role of “offers,” with insights into the areas of improvement that will drive strengthened efficacy of promotional spend, in order to drive engagement with the program and the Brand.

#### Simplified Sample Lifecycle

### 04. Role of the Rep

Looking ahead to a post-COVID-19 world, one that is sure to remain increasingly digital, this chapter shares insights into the importance of the role that representatives play in Member Engagement. To fulfill their role in delivering the Loyalty Program promise: now, more than ever, insights convey that representatives need to excel on key competencies that strengthen (make) the Member relationship, while correcting for those that can destruct (break) it.

Programs achieve a **3.7× lift in satisfaction** and **47% higher engagement** among Members who strongly agree its representatives help them get the most out of it.

## 05. Co-brand Congruence

Brand-aligned payment extensions of non-tender Loyalty Programs drive multiplicative value for Members and the Brand. Bond's insights validate the purposefulness of aligning credit card and program loyalty mechanics. Members participating in both programs need to derive benefit and value that solidifies and strengthens the relationship—and that expands beyond what would be achieved if the Member was only participating in one or the other.

### Only 2/5 of Members

**strongly agree that Loyalty Programs and their associated co-branded credit cards are working together seamlessly.**

### 3/4 of Members

**in a co-branded Credit Card or Loyalty Program feel strongly that these programs are a key part of their relationships with Brands.**

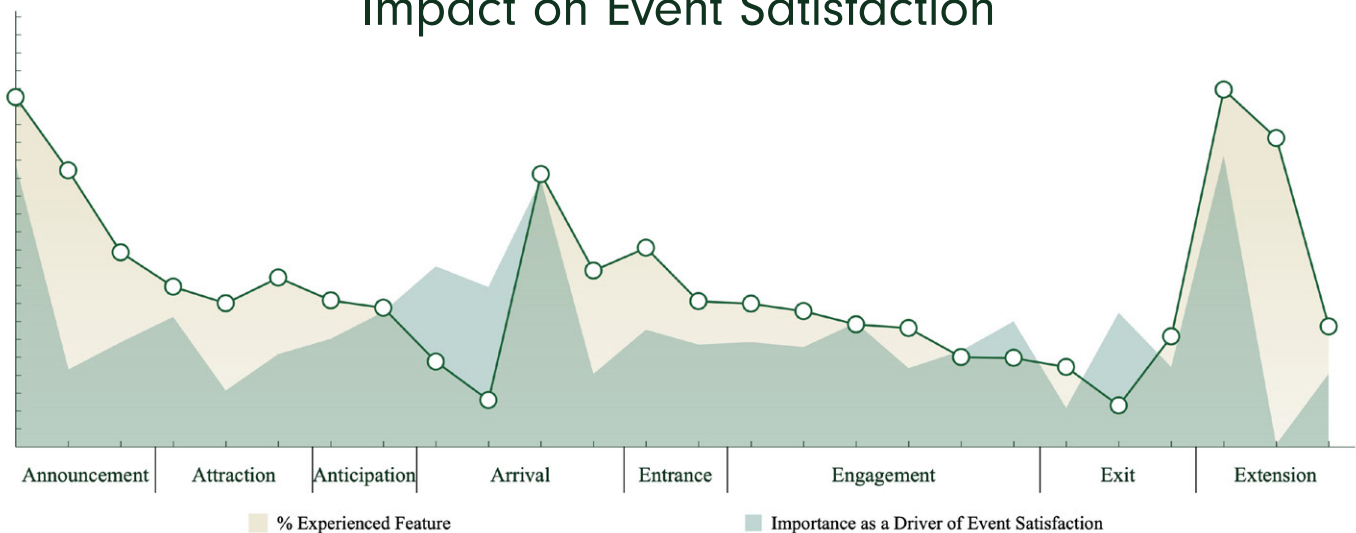

## 06. Live Experiences

In this chapter, we dissect the cornerstone elements that drive successful Member-exclusive live Brand experiences so that Program operators can find a path to an attributable return on investment. While the current climate may have put a pause on these interactions, they will shift and adjust in the “new normal” to become an integral point of engagement. Bond’s research highlights experiences that drive the most value from engaging participants before, during, and after the event—all within the context of current market dynamics and future dynamics of what may be the “new normal.”
