Question: Can the supermarket apply if they have another store in a different zip code participating in the program? We have a partner supermarket in the 10459 zip code that we would like to apply for but they have a location in the 10451 zip code participating.

Answer: Yes, supermarkets that currently participate in the Get the Good Stuff program can apply for another location if it meets the eligibility criteria outlined on pages 4-5 of the RFA. Supermarkets may also apply for more than one store location. Each location requires a separate and complete application.
