

Appy Pie's Student App Developer Program

An Educational App Development Curriculum for K-12 and University Students

Appy Pie's Student App Developer Program is specifically designed to help teachers deliver mobile app development learning in the most innovative ways, which inspires creativity and foster entrepreneurship among students who want to achieve new heights in this fast-growing app industry.

Appy Pie's Student App Developer Program allows K-12 and university students to master all concepts of mobile app development, right from creation to launch

No Coding Skills
Required
Just Drag & Drop.

Use Appy Pie
TO BUILD YOUR MOBILE APPS
**NO CODING
NEEDED**

Our vision is to make app development learning enjoyable so that students can easily learn and execute the basics of mobile apps, without any coding knowledge. The Select > Design > Build process guides students to create apps in a logical order, helping them cultivate critical and creative thinking.

Appy Pie Marketplace

Appy Pie Marketplace provides a web platform to teachers and students where they can showcase their mobile apps that they have created, and let others directly download the app on their mobile devices, similarly as on any other app store.

Why Appy Pie's Student App Developer Program is a complete Mobile App Development Package for teachers and students ?

Our success in the mobile app industry has given us a reason to create an educational app development curriculum that complements 21st century learning. To make our App Development Curriculum more useful for teachers and students, we offer hands-on training, 24/7 online access to our mobile app building platform, professional development workshops, and round-the-clock support with skilled resources, and videos tutorials.

A Mobile App Development Curriculum for Students with No Coding Skills

Appy Pie allows students with no programming skills, to create mobile apps in a matter of minutes. We also provide hands-on training and round-the-clock support to teachers so that they can impart high quality mobile app development learning to their students, while primarily focusing on nurturing their interests and passion. With Appy Pie, there is no need to install or download anything, students can simply drag & drop the app pages to create the mobile apps online.
