

License and disclaimer for the use of EuroVelo GPX tracks

Last updated in October 2024

EuroVelo GPX tracks License

These EuroVelo GPX tracks are made available under the [Open Database License](#). Any rights in individual contents of the database are licensed under the [Database Contents License](#).

The ODbL License implies that **you are free**:

- **To share**: copy, distribute and use EuroVelo GPX tracks.
- **To create**: produce works from EuroVelo GPX tracks.
- **To adapt**: modify, transform and build upon EuroVelo GPX tracks.

As long as you:

- **Attribute**: you must attribute any public use of EuroVelo GPX tracks, or works produced from EuroVelo GPX tracks, with the following notice: “*Contains information from EuroVelo GPX tracks downloaded from www.EuroVelo.com on [DATE], which is made available here under the [Open Database License \(ODbL\)](#).” For any use or redistribution of the EuroVelo GPX database, or works produced from it, you must make clear to others the nature of the license of the database and keep intact any notices on the original database.*
- **Share-Alike**: if you publicly use any adapted version of this database, or works produced from an adapted database, you must also offer that adapted database under the ODbL.
- **Keep open**: If you redistribute the database, or an adapted version of it, then you may use technological measures that restrict the work (such as DRM) as long as you also redistribute a version without such measures.

Disclaimer for the use of GPX tracks

While ECF and [National EuroVelo Coordination Centres \(NECCs\)](#) make every effort to ensure the tracks and their levels of development are both current and accurate, errors or outdated information can occur. The user is fully responsible for his or her own safety when making use of the tracks and for following national traffic rules and signing.

ECF and relevant NECCs assume no responsibility or liability for any errors or omissions in the contents of the tracks, or for the consequences of the use of these tracks. All information on this site is provided "as is", with no guarantee of completeness, accuracy, timeliness, or of the results obtained from the use of this information. In no event will ECF, its employees, network of NECCs or other partners thereof be liable to anyone for any decision made or action taken in reliance on the information in these tracks or for any consequential, special or similar damages, even if advised of the possibility of such damages. Note that in countries without a NECC, tracks have more chances to be outdated and to contain errors.

ECF does not control nor is responsible for the GPX tracks for EuroVelo routes found on other, linked websites.

The tracks available on www.EuroVelo.com are the reference for the itineraries of EuroVelo routes. The tracks were last revised by NECCs between February and July 2024. While the tracks were accurate when they were provided, there may have been changes since that date. Please be aware that if there are temporary route deviations, the tracks may not show this. For more up-to-date tracks, please visit the national / regional websites linked to on EuroVelo.com, on country and country per route pages.

For additional information on the GPX tracks of EuroVelo routes, their levels of development and detailed information, users can read the [EuroVelo Route Development Status Report](#) and contact relevant NECCs, whose contact details are available on [this page](#). For additional information on the transnational level, users can contact eurovelo@ecf.com. Further information can be found in the [F.A.Q.s](#). Users are encouraged to contact the ECF EuroVelo Team and relevant NECCs if they identify any errors in the tracks.

How to use the tracks?

Please be aware that the downloaded tracks will not display perfectly on all available route planning and navigation apps allowing to import external GPX tracks.

In order to make things easier for users, the EuroVelo Management Team has published two useful articles:

- [How to plan your cycling trip using EuroVelo GPX tracks?](#)
- [Using EuroVelo GPX tracks on route planning and navigation apps: A comparison](#)

This table shows the comparison of the most popular route planning and navigation apps (in their free versions, except for RideWithGPS), in terms of how EuroVelo GPX tracks get displayed:

	Import option on app (not only on website)	Possibility of full route import	Clear display of "daily" sections	Display of development status info	Display of basic extracted info (length, elevation)	Display of detailed extracted info (surfaces, route types)
AllTrails	NO	YES	YES (only on website)	NO	YES	NO
Bikemap	YES	NO (only imports first section)	NO	NO	YES	YES
Komoot	YES	YES, BUT SLOWLY (possibility to import sections one by one)	YES	YES	YES	YES
Naviki	NO	YES	YES	NO	YES	NO
OsmAnd	YES	YES	YES	NO	YES	NO (but info from OSM – details available on map)
OutdoorActive	YES	NO (imports the longest continuous part of the route)	YES	YES	YES	NO (but info on points of interest)
RideWithGPS	IMPORT OPTION ONLY AVAILABLE IN PREMIUM VERSION (see below)	YES – in Premium	YES – in Premium	YES – in Premium	YES	YES
RouteYou	NO	NO (only imports one section)	NO	NO	YES	YES
Wikiloc	NO	NO (possibility to import sections separately but incomplete list)	NO	YES	YES	NO
Garmin Basecamp (computer software)	N/A	YES	YES	YES	YES	NO

For more experimented users, it is recommended to use [Garmin Basecamp](#) or [QGIS](#) to access tracks in their entirety, including information on the route development categories per daily section.

What are the EuroVelo route categories and what do they mean?

EuroVelo routes and sections are classified according to one out of five categories of EuroVelo routes:

- **Certified EuroVelo routes (continuous green line):** sections of at least 300 km that have successfully undergone the certification process in line with ECF's [European Certification Standard](#). It is the highest quality level on the EuroVelo network.
- **Developed with EuroVelo signs (continuous yellow line):** developed route (see category below) with continuous signing along the route, incorporating EuroVelo route information panels.
- **Developed (at national/regional level) (continuous red line):** route developed for cyclists and signed in line with the respective national standard (i.e. it is part of a local, regional or national cycle network). There must also be a website providing information to users. Developed route can be heterogeneous in terms of infrastructure: type of cycling infrastructure, surface, width, gradients, etc.

- **Under development (but usable) (dashed red line):** route containing sections that require further development (e.g. stretches on public highways with high levels of traffic). Cyclists are advised to use public transportation to skip these non-developed stretches.
- **At the planning stage (dotted red line):** undeveloped route with no detailed information publicly available on the Internet. The itinerary communicated is a proposal for the best possible option currently available. It may also contain dangerous sections. Cyclists are advised to use public transportation to skip these non-developed stretches.
