6 July 2022

RATINGS, RANKINGS AND ASSESSMENTS

Higher Education Sustainability Initiative

HESI+10 Celebrating 10 years with Higher Education Sustainability Impact

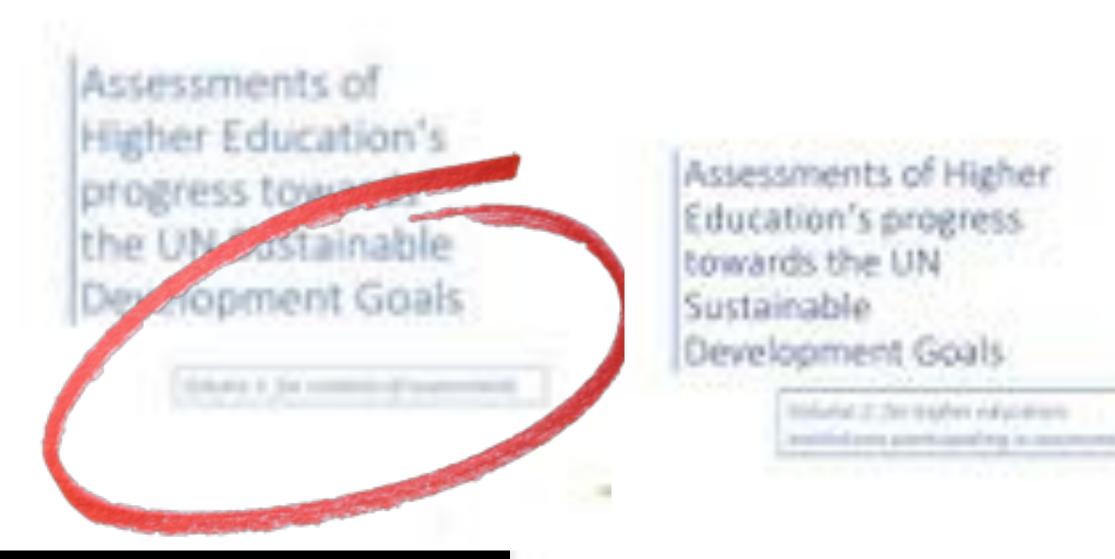

Context

The UN Higher Education Sustainability Initiative (HESI) has recognized that the current ranking process that currently exists by a range of partners is measuring University outputs that are not fully aligned to meeting the sustainable development goals.

To try and address this, a group of leading thinkers, experts and practitioners supported by UN Environment devised a set of guidelines on higher education institution rankings, ratings and assessments (RRAs) that were shared with HESI partners for their feedback over 2019-2021.

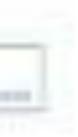

https://sdgs.un.org/HESI/rankings-ratings-and-assessment

Assessments of Higher Education's progress towards the UN Sustainable Development Goals

Value 2 32 institute of accession in

NOT JUST A DOCUMENT ON THE SHELF

Once these were launched, international Rating, Ranking and Assessment organizations (RRAOs) were invited to commit to implementing the guidelines.

Those who did – a cohort of ten RRAO leaders - were convened by HESI in a Global Leaders' Roundtable to see how these recommendations could be applicable with the aim of potentially having a more consistent set of guidelines in place by 2025, and in doing so form an international community of practice.

GLOBAL HEI ASSESSMENTS LEADERS' ROUNDTABLE

The Association for the Advancement of Higher

Since then, other organizations have committed to

THE WORK HAS JUST BEGUN.

The Roundtable was conceived as a **safe space for** open, transparent collaboration amongst peers, with the support of HESI partners.

It has made progress in the short time since its launch in October 2021, with the group looking at alignment with the Guidelines as well as other potential leverage points that could be leveraged for systems change.

SDG-Aligned Taxonomies

The Reach and Impact working group, part of the <u>SDG Publishers Compact</u> <u>Fellows program</u> believe that the proliferation of taxonomies related to the Sustainable Development Goals poses a challenge to all stakeholders.

We are exploring this further, including an audit of current SDG taxonomies/keyword tools and what demand (if any) there is for a single version of truth. While one single taxonomy might be an ideal outcome, key considerations include:

- How would a single taxonomy be created, hosted and maintained?
- Would all stakeholders be willing to use this? What would incentivise them?
- What work is already happening in this space? Many stakeholder groups will already have their own initiatives in development/launched. Is there scope to draw best practice from these?
- How could SDG-aligned research then be badged?

We will be conducting a brief survey of editors who work with the publishers who are already members of the <u>SDG Publishers Compact</u>. After this we will send survey to editors at other publishers.

Higher Education Sustainability Initiative

HESI+10 Celebrating 10 years with Higher Education Sustainability Impact

The Future of SDG-focused academic publishing -**Solutions Summit**

The HESI SDG Fellows group will host a convening of representatives from academia, industry, policy, and publishing.

Key audiences:

- Researchers
- Practitioners
- Publishers
- Editors
- Librarians

Format: Virtual event since it is more cost efficient, quicker to arrange, and can facilitate diverse representation. This will be an initial workshop/roundtable to gather ideas and generate proposals.

Include a crowdsourcing challenge or hackathon style event

Outcome: Best practice, creation of an academia-industry coalition focused on one or more SDGs, new links and relationships, content / product development ideas.

Discussion topics could include:

barriers to that use

Are there gaps in research that need to be filled?

Is the latest research communicated in a way which is comprehensible, usable, and actionable by industry and other practitioners?

Why is it important to do this?

Education for Green Jobs

Workforce Readiness for the Green Economy

Debra Rowe

Green Jobs: Workforce Readiness for the Clean Energy Transition

Collaborators:

Contributions from the following groups: IREC EAUC IAU ILO IRENA NYEC **SDSN** UNEP **UNESCO UNIDO UNITAR** UPF World Bank

The green economy employers are very busy! They are implementing climate solutions.

- **Core Challenge**: There are thousands of technical institutions and universities in tertiary education.
 - Green economy companies and nonprofits don't have the time to tell each institution, or each country ministry, what they need in curricula, skills and job placement processes.
 - Many employers don't have adequate connections and 0 resources to recruit people into the field
- **Core Solution**: HESI's and UNEP-YEA's Green Jobs initiative is • designed to work with all interested people to help employers meet workforce needs more effectively.

Outcomes for the green economy

Improved:

- Curricular upgrades and employee skills 1.
- Career Guidance 2
- Student/Employee recruitment & job placements 3.
- More useful research aligned to climate and 4. other SDGs

Components of the initiative. What we are doing:

- **Convened technical vocational and university educators.** 1. (With the International Association of Universities) Feb '22
- **Convened employers** (With REN21) Feb '22 2.
- IRENA complementary survey on skills gap Spring '22 3.

Timeline of activities internationally:

4. Green Jobs Initiative Solutions Summits

- June '22 Recruiting Students and Streamlining Job Placement a.
 - Energy and Climate Heroes campaigns
 - Solving barriers to entry and employment
 - Creating an inclusive workforce and improving retention
- September '22 Research alignment a.
- **October '22** Curricular Updates b.
- **Ongoing** Virtual Community sign up to be invited to the Solutions C. Summits and included in the virtual community

Making STEMM Programs Accessible and Inclusive for Girls, Women, and Minorities

Dana Compton Managing Director & Publisher American Society of Civil Engineers

ASCE 21 June 2022

Why Are Diversity and Representation Important in **Civil Engineering?**

For civil engineering solutions to serve society well, they need to include perspectives that are representative of a society's rich diversity

That requires engaging people from more diverse backgrounds in the profession and ensuring they solve problems with, not just for, the communities they serve

ASCE DEI Best Practices Resources Guide: https://www.asce.org/-/media/asce-images-and-files/diversity-equity-and-inclusion/documents/dei-front-matter-best-practices-resource-guide.pdf

JIBS Responsibility in Action & Program Directors Support

Shaping generations of responsible managers, leaders, entrepreneurs

JÖNKÖPING UNIVERSITY

Jönköping International **Business School**

Context

In 2020, it was collectively decided by the executive team and Guénola that the best strategy to help embed JIBS Guiding Principle *Being Responsible in Action* would be to focus on Education & offer training support & resources to the teachers.

By "educating" the educators, JIBS hope for in depth transformation regarding Agenda 2030.

Offered Support

In agreement & continuous dialogue with program director

Collective program brainstorming:

Meeting with course examiners & program director.

External review: Benchmarking & Inspirations:

With help of interns, research other programs in Sweden and worldwide, review schools, research and needs emerging from the market

Internal review: Entire program:

Courses, syllabus, ILOs, students

Recommendations & Transformation Support:

Strategic recommendations, recommendations of references, textbooks, case studies, innovative teaching settings

What's next?

Recruit interns

Date

Conduct similar work with another program.

Need for one more Program for Fall 2022

Managed by Guénola
