

IMTLazarus is an advanced classroom management and security solution designed to enhance the digital learning environment. It provides robust tools for content filtering, device management, user activity monitoring, and more! **This product stands above and beyond anything currently available on the market** – empowering educators to create safer online learning environments for students everywhere.

KEY BENEFITS

Enhanced Security

Provides a secure digital environment by blocking inappropriate content and alerting administrators.

Improved Classroom Management

Enables teachers to control student devices, distribute tasks, and monitor progress in real-time.

Scalable Solutions

Accommodates institutions with hundreds to thousands of devices, providing flexible and robust management options.

Ease of Deployment

Quick and efficient implementation with specific tools designed for easy deployment.

Friendly Interface

Highly customizable and streamlined interface build to reduce adoption time.

USE CASES

K-12 Schools

Secure and manage student devices, ensuring a safe online learning environment.

District Deployments

Scalable management for large deployments across multiple campuses.
