

Conservation Horticulture for Dipterocarpaceae

*Adapted from the 'Workshop on Conservation of
Dipterocarpaceae in Borneo'
Pangkalan Bun, Indonesia, September 9th- 12th, 2019*

Part of the **'Securing the future of threatened tree
giants in Borneo'** Project

Introduction

The ‘Securing the future of threatened tree giants in Borneo’ project (2018-2020) was funded by the National Geographic Society. The objectives of this project are:

- **Securing target Dipterocarp species by improving *in situ* information and developing living collections as sources for species recovery**
- **Building technical and horticultural skills of local conservationists to ensure continued tree conservation**

This module is adapted from the content of the project workshop held in Pangkalan Bun in September 2019.

The module aims to provide basic guidance on conservation techniques for Dipterocarpaceae.

For more information on this project visit the [Global Trees Campaign website](#).

Contents

This module is comprised of the following sections:

1. Introduction and Acknowledgments
2. Dipterocarpaceae of Indonesia
3. Collection and Nursery Propagation
4. Seedling Selection and Planting

BGCI

End of Section 1.

Go to Section 2: Dipterocarpaceae of Indonesia
