Network Notification

Date: **August 22, 2016**
To: **CareSource Health Partners**
From: **CareSource®**
Subject: **Cite® AutoAuth expansion for inpatient authorizations**

CareSource is excited to announce the upcoming integration of **Cite AutoAuth** into our **inpatient prior authorization process**. You will still initiate your authorization requests through the provider portal just like you do today; however the Cite AutoAuth module will make it easier for you to document requests and faster to obtain approvals. Benefits include:

- No initial phone call, email or fax is necessary
- Ability to upload clinical information to support request for authorization
- Immediate approval or pend status of an authorization

What do I need to do now?

Watch for the "It's Live" announcement on the provider portal in early September. In the meantime, get a sneak peek at how easy it will be!

Go to **CareSource.com.** Under **Provider Resources,** click **Provider Portal.** Log into the portal and select **Prior Authorization.** Here you will find links to a short video, step-by-step guide, FAQs and MORE! Everything you need to know on how to get the fastest response to your authorization request!
