Subject: New Online Interactive Health Risk Assessment for OH Medicaid and CareSource Just4Me members

At CareSource, we believe that members who participate in their own health care are more likely to follow their provider's advice as well as make sure they and their family members receive immunizations and preventive health screenings. To that end, CareSource is pleased to announce our new interactive online Health Risk Assessment called *Succeed* and *Snapshot*.

Succeed is a more in-depth health risk assessment that takes less than 15 minutes to complete. *Snapshot* is a shorter assessment that can be completed in less than 10 minutes. Members who choose to complete either of these assessments receive an immediate Health Score and information on how to improve their health on completion of the assessment. This new online offering is available to CareSource Ohio Medicaid and CareSource Just4Me™ members.

Members who take the online Health Risk Assessment can:

- Create their own member pages within the Health Risk Assessment portal
- Receive helpful health tips and email reminders
- Try online tools within the portal including BMI measurement and healthy recipes
- Stay informed with the latest health news

Please encourage your CareSource Ohio Medicaid and CareSource Just4Me patients to try the new online Health Risk Assessment. It is free and available at CareSource.com. Members can also call the CareSource Member Services Department to request a printed Health Risk Assessment that they can complete and return by mail to CareSource.

If you have any questions, please contact your Provider Relations representative or call Provider Services at 1-800-488-0134. CareSource is working to provide members health care with heart, and give providers that same care as well. Thank you for being our partner in good health.
