

# EI branch network

## Connect, engage, grow in your region

**Engage with your local branch to access your membership benefits and support your professional development close to home or work.**

Our branches run lectures, debates, social events and site visits, enabling energy professionals to meet, learn and share experience.

You can discuss energy issues and technologies with your peers and enjoy invaluable networking opportunities and access to industry leaders and academics.

You can also support your professional development by attending local professional membership workshops, becoming a mentor or joining the branch committee.

The EI branch network also offers localised training courses.

## Young Professionals Network (YPN)

Our branch YPNs provide support to graduates and students and anyone in the early stages of their career.

YPNs organise tailored activities for young professionals to help:

- network with peers, employers and experienced EI members
- engage with the industry through workshops, panel discussions and topical presentations
- work towards professional recognition and chartered registration with a mentor

A growing number of branches now have a YPN so check the website for details:

# Where are we?

## UK branches

- 1 Aberdeen Highlands and Islands
- 2 East Midlands
- 3 Essex and East Anglia
- 4 Humber
- 5 London and Home Counties
- 6 North Eastern
- 7 Northern Ireland
- 8 North Western and North Wales
- 9 Southern
- 10 Southern Scotland
- 11 South Western and South Wales
- 12 West Midlands and Mid Wales
- 13 Yorkshire

## International branches

Republic of Ireland, Netherlands, Nigeria, the Middle East, Malaysia, and Hong Kong. Each branch has its own committee and programme of events to support our members all over the world.

*"The EI branch network offers a local place to hear new ideas and discuss energy on a neutral open platform and to interact with different disciplines in the sector. It also brings together members at all stage of their careers, from students to time-served professionals and industry leaders, giving us great networking benefits."*

**Mark Hobbins CEng MEl**  
**Chartered Energy Engineer,**  
*Secretary, Southern Scotland branch*
