

Turning the energy value chain upside down: a smart, flexible energy system

Wednesday, 22 February 2017

The Worshipful Company of Fuellers is pleased to announce the latest 'Conversation' evening that examines some of the challenges facing the energy industry.

About The Worshipful Company of Fuellers

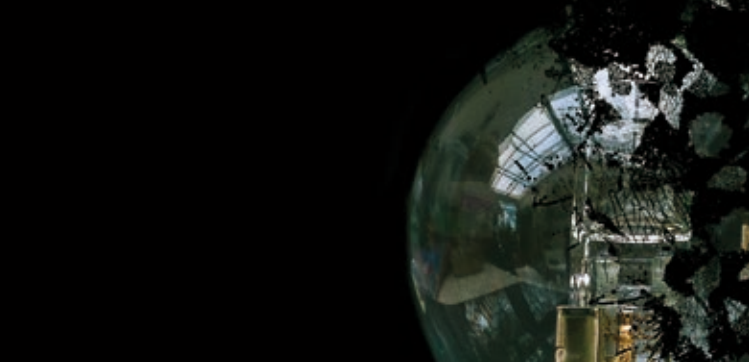

The Worshipful Company of the Fuellers is 95th in the distinguished roll of the 109 Livery Companies of the City of London. Whilst the history of the Fuellers is steeped in coal and its origins can be traced back to Woodmongers in the 14th Century, the Fuellers diversified in recent years, now representing all sectors in the energy industry. The present membership, open to those engaged in or having a significant interest in the energy industry, includes representatives from the coal, oil, nuclear, gas, electricity and renewable energy industries.

For further information about The Worshipful Company of Fuellers, please contact:

The venue

Wednesday, 22 February, 17:30-20:30

EY Office, 1 More London Place, London, SE1 2AF

Tel: + 44 20 7951 2000

About EY

The energy sector is constantly changing. Price volatility and market uncertainty, geopolitical risks, growing demand in developing countries, significant changes in the supply environment and the need to invest in new infrastructure.

At EY we understand energy. Whether working with utility companies to meet the challenges of an ever demanding consumer, advising on utility asset investments, providing funding advice for large scale renewable projects or helping high energy users optimise their energy consumption. Our people take a pragmatic, holistic and commercial view of energy needs offering advice around the globe. We recognise that managing energy is now an issue for every organisation. With an increasing focus on sustainable business as a prerequisite for success, we can help organisations create long-term value by embracing opportunities and managing risks from environmental, social and economic factors.

Jason Brogden

Director and Consultant at Jason Brogden Consulting

Jason has been involved in major energy industry reform programmes since he joined the industry in the early 1990's, including the development and operation of the electricity wholesale trading arrangements, retail market competition and smart metering. Jason has been working with the Energy Networks

Association for the last few years on developments for the network companies. Last year, he was ENA Programme Director for the delivery of the new 105 telephone number to call for power-cuts and is now ENA TSO-DSO Project Director to develop the transition of network operators to system operators to reflect a greater role for active management of supply and demand on distribution networks.

About EY

EY is a global leader in assurance, tax, transaction and advisory services. The insights and quality services we deliver help build trust and confidence in the capital markets and in economies the world over. We develop outstanding leaders who team to deliver on our promises to all of our stakeholders. In so doing, we play a critical role in building a better working world for our people, for our clients and for our communities.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. For more information about our organization, please visit ey.com.

Ernst & Young LLP

The UK firm Ernst & Young LLP is a limited liability partnership registered in England and Wales with registered number OC300001 and is a member firm of Ernst & Young Global Limited.
