

2021 CyberTipline Reports by Electronic Service Providers (ESP)

NCMEC's CyberTipline is the nation's centralized reporting system for the online exploitation of children, including child sexual abuse material, child sex trafficking and online enticement. In 2021, the CyberTipline received more than 29.3 million reports. 29.1 million of these reports were from Electronic Service Providers that report instances of apparent child sexual abuse material that they become aware of on their systems.

Higher numbers of reports can be indicative of a variety of things including larger numbers of users on a platform or how robust an ESP's efforts are to identify and remove abusive content. NCMEC applauds ESPs that make identifying and reporting this content a priority and encourages all companies to increase their reporting to NCMEC. These reports are critical to helping remove children from harmful situations and to stopping further victimization.

The following is a breakdown of reports by electronic service providers.

ESP	Number of Reports
4chan	973
