

2023 Total Notifications sent by NCMEC to Unresponsive Electronic Service Providers (ESP)

When imagery of child sexual exploitation is reported by child victims, their guardians/caregivers, or INHOPE member hotlines from around the world, NCMEC can provide crucial support by notifying relevant platforms to review and remove any explicit images of the child. Notices are sent in three categories: CSAM, exploitative content that doesn't meet the legal definition of CSAM but depicts identified child victims, and sexually predatory text related to sexual comments or personal information about an identified victim.

After visually reviewing the reported imagery, NCMEC staff members notify the electronic service provider where the image or video has been shared. Once a notice has been sent, NCMEC staff manually track the status and will generate additional notices until the content is addressed. This can only help stop the circulation of imagery of child sexual exploitation, when the company is responsive and takes action, but in some instances, the companies do not respond to NCMEC's notices.

The following is a breakdown of notifications by unresponsive electronic service providers:
