

Deutsche Telekom AG

The ratings of Deutsche Telekom AG (DT) reflect its leading position in its domestic market and a diversified portfolio of international assets, which includes T-Mobile US, Inc. (TMUS; BBB+/Stable), one of the largest mobile operators in the US. We expect consolidated free cash flow (FCF) generation to increase significantly from 2023 as US EBITDA continues to grow and capex falls. Rating constraints include high leverage in 2022, cost inflation and competitive fixed and mobile markets in Germany.

Fitch Ratings' assessment of DT's key credit metrics focuses on the company's European operations and considers TMUS on a proportionate consolidated basis, reflecting its significant minority shareholding along with weak legal and operational ties between the companies. On this basis, DT is comfortably positioned within its 'BBB+' rating.

Key Rating Drivers

TMUS Majority Achieved: DT reached a majority shareholding in TMUS at 50.2% in March 2023, following its decision to not participate in TMUS's share-buyback programme. DT can further increase this stake with its remaining call options and further share buybacks at TMUS. Softbank has true-up rights on TMUS shares if the share price exceeds a threshold, so to avoid future dilution of its shareholding to below 50% we expect DT to continue increasing its shareholding in TMUS over the next two years.

Proportionate Rating Profile: TMUS is a strategically important asset for DT as its biggest EBITDA contributor on a consolidated basis and a major driver of consolidated EBITDA growth. We believe that the best way to quantitatively assess DT's ability to meet its debt obligations is to consider the cash-generation capacity of its European operations but consolidating TMUS on a proportionate basis. This reflects a combination of factors, which include the significant minorities in TMUS, weak legal ties, limited operational ties with DT and a standalone funding structure for TMUS.

Strong Remaining European Profile: Following the proportionate consolidation of DT's US operations, the credit profile of DT is anchored around its domestic operations, which account for about two thirds of non-US EBITDA. DT's other European operations and group functions account for the remaining proportion. It retains strong geographic diversification and well-positioned, convergent operator subsidiaries in other European markets that support stable EBITDA growth and deleveraging capacity to keep leverage below the rating's negative threshold on a proportionate basis.

Domestic Market Leadership: As the German incumbent, DT has leading subscriber market shares in both fixed and mobile services with limited churn and only modest average revenue per user (ARPU) decline in recent years. EBITDA in Germany grew for 26 consecutive quarters to 1Q23. Its total telecom service revenue market share in Germany was around 42% in 2022. DT has the largest footprint of digital subscriber line homes passed and vectoring technologies have been used to bring high speeds, which compete effectively against cable.

DT has near national coverage of 5G in Germany. It also covers over 5.7 million homes with its fibre to the home (FTTH) network (as of end-1Q23) and aims to add 2.5 million homes in 2023. This technological network leadership cements its strong competitive position.

evgeniya.chernyaeva@fitchratings.com

Tom Steabler
+44 20 3530 1661
tom.steabler@fitchratings.com

FTTH in Focus: We expect DT to participate in TMUS share buybacks from 2024, which may provide additional firepower for rolling out high-speed fibre across Europe. In Germany and other European markets, DT is competing with multiple alternative network operators in rolling out fibre. A tougher capital market environment has seen a number of these providers exit the market and may provide opportunities for competitors like Vodafone Group Plc (BBB/Positive) to quickly gain scale in fibre and increase competition in areas with no overlap with DT's own network.

Limited Leverage Headroom: DT has exceeded its own consolidated, company-defined net leverage target of 2.25x-2.75x since 2020. Fitch-defined EBITDA net leverage was 2.9x in 2022 with TMUS consolidated on a proportionate basis, leaving minimal headroom below the 3.0x downgrade threshold. The sale of its controlling stake in GD Towers in 2023 and continued EBITDA growth should improve financial flexibility and reduce proportionate Fitch-defined EBITDA net leverage to around 2.6x by 2025. This assumes modest spectrum payments beyond the USD3.5 billion payment to Columbia Capital for 600 MHz in the US and no additional M&A other than announced acquisitions like Mint Mobile.

Evolving Competitive Risks: The deployment of a fourth mobile network in Germany by 1&1 Drillisch is unlikely to significantly destabilise the market structure given its existing mobile customer base. However, speed- and data-monetisation opportunities that drive ARPU gains could be hit in the medium term by greater alternative wholesale fixed-line availability and 1&1 Drillisch's plans to improve network utilisation. We view the probability of global technology companies entering large European telecom markets like Germany as low given limited ARPUs versus markets' like the US but such moves might create retail subscriber market-share pressures.

Financial Summary

(EURm)	2021	2022	2023F	2024F	2025F
Gross revenue	105,962	112,839	111,866	114,480	117,501

Rating Derivation Relative to Peers

DT has a strong operating profile that is driven by a combination of a leading domestic position in Germany and the growing scale and FCF of TMUS following its merger with Sprint in 2020. The company is rated in line with that of other western European diversified telecoms operators with similarly strong domestic operations and a geographically diversified portfolio of international businesses such as Orange S.A. (BBB+/Stable), Vodafone and Telefonica SA (BBB/Stable).

The combination of a strong domestic position and diversified business portfolio enables slightly higher leverage capacity for DT's ratings compared with operators with limited scale such as BT Group plc (BBB/Stable) and Royal KPN N.V. (BBB/Stable). No country-ceiling, parent/subsidiary or operating environment aspects affect DT's ratings.

Factor Score Relative to IDR: Worse positioned than IDR (Red), Within one notch of IDR (Blue), Better positioned than IDR (Light Blue)

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade:

- EBITDA net leverage on a proportionate basis for TMUS sustained below 2.0x, corresponding to funds from operations (FFO) net leverage below 2.3x
- Sustained FCF growth that is sufficient to cover continued investments in FTTH and mobile spectrum payments
- Continued market leadership and positive subscriber growth momentum in the US with a stable market share

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade:

- An increase in EBITDA net leverage on a proportionate basis for TMUS to above 3.0x on a sustained basis (corresponding to FFO net leverage above 3.3x). Spikes in leverage may be consistent with the current ratings if the company has a credible plan to reduce leverage within 18-24 months
- Pressure on FCF driven by EBITDA-margin erosion, consistently higher capex and shareholder distributions, or significant under-performance in the core domestic market and at other key subsidiaries

Liquidity and Debt Structure

Robust Liquidity, Well-Spread Maturities: DT's policy is to maintain a sufficient liquidity buffer to cover 24 months of debt maturities. At 1Q23, DT had liquidity reserves of EUR19.5 billion, excluding TMUS, comprising EUR7.5 billion cash and cash equivalents and EUR12.0 billion undrawn committed credit facilities versus EUR2.4 billion maturities to end-2023.

ESG Considerations

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit <https://www.fitchratings.com/topics/esg/products#esg-relevance-scores>.

Climate Vulnerability Considerations

Fitch's *Climate Vulnerability in Corporate Ratings Criteria* report describes how we use Climate Vulnerability Signals (Climate.VS) as a screening tool to identify sectors and Fitch-rated issuers that are potentially most exposed to credit-relevant climate transition risks and, therefore, require additional consideration of these risks in rating reviews. [Click here for the criteria.](#)

The 2022 revenue-weighted Climate.VS for DT for 2035 is 17, which is in line with telecommunications sector peers. DT derives most of its revenues from telecommunication activities. We consider a score of 17 to be very low and have not incorporated climate risk in the rating.

Key Assumptions

Fitch's Key Assumptions Within our Rating Case for the Issuer

- All assumptions, unless otherwise stated, relate to DT's reported numbers that fully consolidate TMUS
- Annual revenue growth, excluding TMUS, of 0%-1% per year in 2023-2026
- TMUS revenue growth of 1%-3% on a constant currency basis in 2023-2026
- Fitch-defined EBITDA margin to increase to 31.2% in 2023 and to 34.1% by 2026
- Total cash tax as a percentage of Fitch-defined EBITDA at around 2% in 2023 before increasing to 14% by 2026, mostly reflecting cash tax increases in TMUS
- Capex, including spectrum payments, of 15%-19% of revenue in 2023-2026
- Share buyback at TMUS of around USD20 billion per year from 2024
- Euro/dollar exchange rate of 1.09 to 2026

How to Interpret the Forecast Presented

The forecast presented above is based on Fitch Ratings' internally produced, conservative rating case forecast. It does not represent the forecast of the rated issuer. The forecast set out above is only one component used by Fitch Ratings to assign a rating or determine a rating outlook, and the information in the forecast reflects material but not exhaustive elements of Fitch Ratings' rating assumptions for the issuer's financial performance. As such, it cannot be used to establish a rating, and it should not be relied on for that purpose. Fitch Ratings' forecasts are constructed using a proprietary internal forecasting tool, which employs Fitch Ratings' own assumptions on operating and financial performance that may not reflect the assumptions that you would make. Fitch Ratings' own definitions of financial terms such as EBITDA, debt or free cash flow may differ from your own such definitions. Fitch Ratings may be granted access, from time to time, to confidential information on certain elements of the issuer's forward planning. Certain elements of such information may be omitted from this forecast, even where they are included in Fitch Ratings' own internal deliberations, where Fitch Ratings, at its sole discretion, considers the data may be potentially sensitive in a commercial, legal or regulatory context. The forecast (as with the entirety of this report) is produced strictly subject to the disclaimers set out at the end of this report. Fitch Ratings may update the forecast in future reports but assumes no responsibility to do so. Original financial statement data for historical periods is processed by Fitch Solutions on behalf of Fitch Ratings. Key financial adjustments and all financial forecasts credited to Fitch Ratings are generated by rating agency staff.

How to Read This Page

ESG relevance scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant to the credit rating and green (1) is least relevant.

The **Environmental (E), Social (S) and Governance (G)** tables break out the ESG general issues and the sector-specific issues that are most relevant to each industry group. Relevance scores are assigned to each sector-specific issue, signaling the credit-relevance of the sector-specific issues to the issuer's overall credit rating. The Criteria Reference column highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis. The vertical color bars are visualizations of the frequency of occurrence of the highest constituent relevance scores. They do not represent an aggregate of the relevance scores or aggregate ESG credit relevance.

The **Credit-Relevant ESG Derivation** table's far right column is a visualization of the frequency of occurrence of the highest ESG relevance scores across the combined E, S and G categories. The three columns to the left of ESG Relevance to Credit Rating summarize rating relevance and impact to credit from ESG issues. The box on the far left identifies any ESG Relevance Sub-factor issues that are drivers or potential drivers of the issuer's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the relevance score. All scores of '4' and '5' are assumed to result in a negative impact unless indicated with a '+' sign for positive impact.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI), the Sustainability Accounting Standards Board (SASB), and the World Bank.

Social (S) Relevance Scores

General Issues	S Score	Sector-Specific Issues	Reference
Human Rights, Community Relations, Access & Affordability	1	n.a.	n.a.
Customer Welfare - Fair Messaging, Privacy & Data Security	3	Data security; service disruptions	Competitive Position; Profitability
Labor Relations & Practices	3	Impact of labor negotiations and employee (dis)satisfaction	Competitive Position; Profitability
Employee Wellbeing	1	n.a.	n.a.
Exposure to Social Impacts	2	Social attitudes toward network infrastructure	Diversification; Technology and Infrastructure; Profitability

Governance (G) Relevance Scores

General Issues	G Score	Sector-Specific Issues	Reference
Management Strategy	3	Strategy development and implementation	Management and Corporate Governance
Governance Structure	3	Board independence and effectiveness; ownership concentration	Management and Corporate Governance
Group Structure	3	Complexity, transparency and related-party transactions	Management and Corporate Governance
Financial Transparency	3	Quality and timing of financial disclosure	Management and Corporate Governance

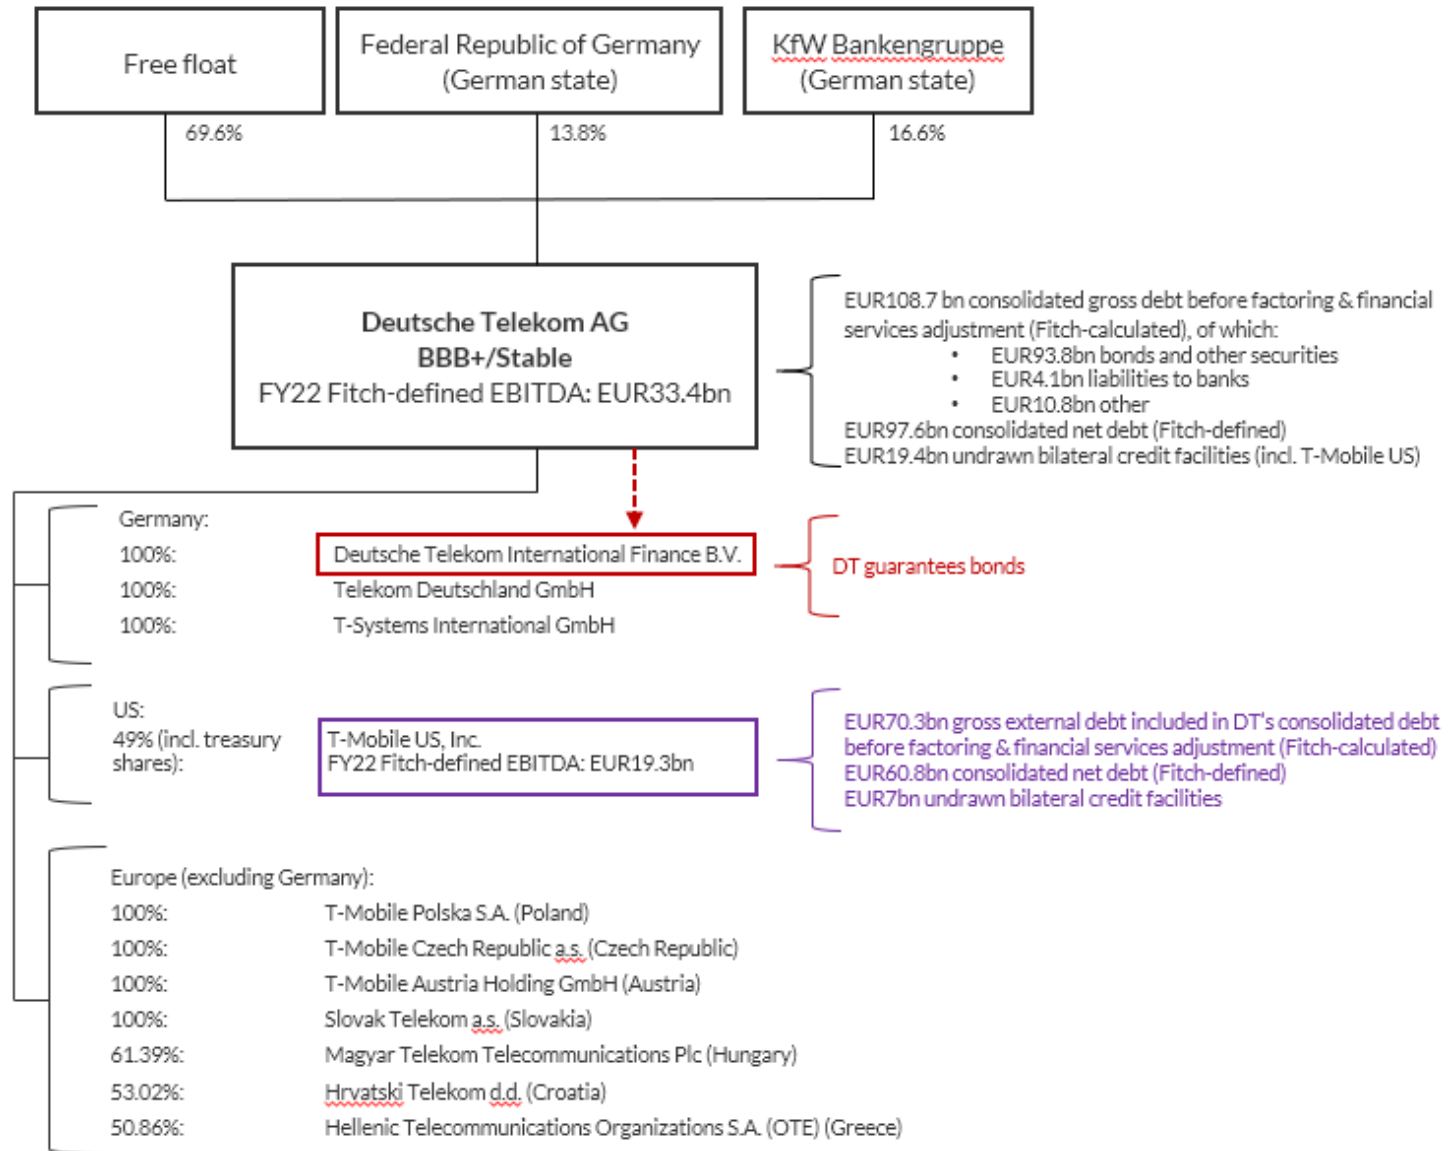

CREDIT-RELEVANT ESG SCALE

How relevant are E, S and G issues to the overall credit rating?

5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2	Inrelevant to the entity rating but relevant to the sector.
1	Inrelevant to the entity rating and irrelevant to the sector.

SOLICITATION & PARTICIPATION STATUS

For information on the solicitation status of the ratings included within this report, please refer to the solicitation status shown in the relevant entity's summary page of the Fitch Ratings website.

For information on the participation status in the rating process of an issuer listed in this report, please refer to the most recent rating action commentary for the relevant issuer, available on the Fitch Ratings website.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
