Disclaimer.

This presentation contains forward-looking statements that reflect the current views of Deutsche Telekom management with respect to future events. They include, among others, statements as to market potential and financial guidance statements, as well as our dividend outlook. They are generally identified by the words “expect,” “anticipate,” “believe,” “intend,” “estimate,” “aim,” “goal,” “plan,” “will,” “seek,” “outlook” or similar expressions and include generally any information that relates to expectations or targets for revenue, adjusted EBITDA, earnings, operating profitability or other performance measures, as well as personnel related measures and reductions. Forward-looking statements are based on current plans, estimates and projections. You should consider them with caution. Such statements are subject to risks and uncertainties, most of which are difficult to predict and are generally beyond Deutsche Telekom’s control, including those described in the sections “Forward-Looking Statements” and “Risk Factors” of the Company’s Annual Report on Form 20-F filed with the U.S. Securities and Exchange Commission. Among the relevant factors are the progress of Deutsche Telekom’s workforce reduction initiative, restructuring of its German operations and the impact of other significant strategic or business initiatives, including acquisitions, dispositions and business combinations and cost-saving initiatives. In addition, regulatory rulings, stronger than expected competition, technological change, litigation and supervisory developments, among other factors, may have a material adverse effect on costs and revenue development. Further, changes in general economic and business conditions, including the significant economic decline currently underway, in the markets in which we and our subsidiaries and associated companies operate and ongoing instability and volatility in worldwide financial markets; changes in exchange and interest rates, may also have an impact on our business development and availability of capital under favorable conditions. If these or other risks and uncertainties materialize, or if the assumptions underlying any of these statements prove incorrect, Deutsche Telekom’s actual results may be materially different from those expressed or implied by such statements. Deutsche Telekom can offer no assurance that its expectations or targets will be achieved. Deutsche Telekom does not assume any obligation to update forward-looking statements to take new information or future events into account or otherwise. Deutsche Telekom does not reconcile its adjusted EBITDA guidance to a GAAP measure because it would require unreasonable effort to do so. As a general matter, Deutsche Telekom does not predict the net effect of future special factors because of their uncertainty. Special factors and interest, taxes, depreciation and amortization (including impairment losses) can be significant to Deutsche Telekom’s results.

In addition to figures prepared in accordance with IFRS, Deutsche Telekom presents non-GAAP financial performance measures, including, among others, EBITDA, EBITDA margin, adjusted EBITDA, adjusted EBITDA margin, adjusted EBIT, adjusted net income, free cash flow, gross debt and net debt. These non-GAAP measures should be considered in addition to, but not as a substitute for, the information prepared in accordance with IFRS. Non-GAAP financial performance measures are not subject to IFRS or any other generally accepted accounting principles. Other companies may define these terms in different ways. For further information relevant to the interpretation of these terms, please refer to the chapter “Reconciliation of pro forma figures”, which is posted on Deutsche Telekom’s Investor Relations webpage at www.telekom.com.
