# ENERGY COMPACT

**EC12: ENABLE THE SDGs THROUGH FAIR AND INCLUSIVE ENERGY TRANSITIONS: Energy to Enable Education Goals** 

# SECTION 1: AVBITION

# **1.1Ambitions to achieve SDG7 by 2030.** [Please select all that apply]

(Member States targets could be based on their NDCs, energy policies, national five-year plans etc. targets for companies/organizations could be based on their corporate strategy)

access to affordable, reliable and	Target(s):         1. Recognition of the interrelation between the rights of access to energy and education and its reflection in the development
modern energy services.	at the national level and the energization of 100% of the country's education centers.
	Time frame: 2030
	Context of the ambition(s):
	In Honduras, access to electricity has been identified as one of its strategic pillars for the generation of policies, plans and st population having access to electricity, as indicated by the Sustainable Development Goal (SDG) 7 (Affordable and Clean E Nations Organization of which Honduras is a signatory.
	SDG 3 (Health and well-being) and SDG 4 (Quality Education) are established to achieve the integral development of commun recognized as human rights and prioritized, however, currently providing education and health quality, implies having access
	as electricity services. In Honduras, there is currently an Electricity Coverage Index of 85.02%, being the lowest in Central A Latin America; In addition, according to the Ministry of Education, it is estimated that there are 17,525 official public second to according to the America to electricity, which represents 36% of the total.
<b>7.2</b> By 2030, substantially increase	Target(s):

# SECTION 2: ACTIONS TO ACHEVE THE AVBITION

2.1. Please add at least one key action for each of the elaborated ambition(s) from section 1. [Please add rows as needed].

7.1	. By 2030, ensure universal access to affordable, reliable, and modern energy services.	202
	Recognition of the interrelation between the rights of access to energy and education and its reflection in the development of policies and commitments at the national level and the energization of 100% of the country's education centers.	
	Develop the Plan for Universal Access to Minimum Cost Electricity for Educational Centers and Health Establishments (PAUECEES).	
•	PAUECEES socialization workshop with involved entities.	
•	Implementation of PAUECEES.	
•	Development of a Policy for Universal Access to Electricity for Honduras (PAUEH).	
	PAUEH policy socialization workshop.	
	Implementation of PAUEH.	
	Development of the Social Electrification Law for Honduras (LESH).	
•	Approval of the Social Electrification Law for Honduras (LESH).	
7.2.	. By 2030, substantially increase the share of renewables in the global energy mix.	20
	Promote universal access for students at preschool, primary and secondary levels to learning related to responsible use, with equity and inclusion of	
	ergy - knowledge, behaviors, and attitudes - with a focus on renewable energy and energy efficiency, which contribute to the achievement of	
	tainable development: models of production, consumption, and lifestyles.	
•	Agreement to introduce Renewable Energy and Energy Efficiency in the curriculum from preschool to high school.	
•	Design of educational material for each of the levels aimed at students and teachers and implementation through pilots in various regions to promote	
	their learning in professional retraining courses and updating skills.	
•	Initiate various types of activities to make schools sustainable, such as support for science fairs with a focus on clean energy, as cross-cutting themes	
	of awareness of sustainable development, such as:	
	<ul> <li>Natural Sciences: turn it into a class where it is based on ecological fundamentals that promote a culture of respect and harmonious coexistence</li> </ul>	
	with nature, the search for balance between nature, the integral development of the person and sustainable development.	
	<ul> <li>Social Sciences: activities that address the deterioration generated by productive economic activities in the environment, the importance of protecting natural resources and preventing natural disasters.</li> </ul>	
	<ul> <li>Physical Education: conceptual and attitudinal contents that seek to develop habits of body hygiene and body care for the maintenance of physical health.</li> </ul>	
•	Create a new optional professional subject on renewable energy and energy saving technologies. Promote their learning in professional retraining	
	and skills updating courses.	
•	Training of teachers, managers, and other educational personnel in vocational and professional guidance with a gender, inclusion, and equity	
	perspective.	
2	Technical training for the formulation evecution and implementation of small programs for autonomous renoughle generation and distributed	20
	Technical training for the formulation, execution and implementation of small programs for autonomous renewable generation and distributed newable generation (mainly solar, wind, and biomass, micro-hydro energy)	20
•	Formulation of training workshops on components of energy projects Implementation of a micro-network development workshop in its various stages	
•		
•	Creation of worktables for the formulation and execution of energy projects.	
•	Design of didactic material aimed at rural communities that will participate in the workshops.	
•	Development of pilots to evaluate the behavior and monitor project progress.	

7.3. By 2030, double the global rate of improvement in energy efficiency.	2021
4. Increase the offer of educational programs on energy efficiency in university education - undergraduate and graduate degrees (architecture	5
engineering, etc.) - and technical and professional education and training (TVET) that allows training professionals committed and experienced with	h
innovation in the production and use of energy.	
• Research and proposals to strengthen links between education-skills and the world of work-labor market needs.	
Workshop to share research results.	
Implementation of a new university curriculum in renewable energies.	
• Support the continuous professional development of qualified teachers, offering training in renewable energy and energy efficient technologies.	
7.b. By 2030, expand infrastructure and improve technology for the provision of modern and sustainable energy services for all in developing countries	s, 2022
least developed countries, small island developing States and landlocked developing countries, in accordance with their respective support programs.	
5. Increase access to electricity to educational centers in the country through the use of energy from renewable sources and the extension of electricit	y
distribution networks.	
• Design, construction, and start-up of electrification projects in educational centers, by extension of the network.	
• Design, construction, and start-up of electrification projects in educational centers, with Solar Photovoltaic Systems.	

# **SECTION 3: OUTCOMES**

3.1. Please add at least one measurable and time-based outcome for each of the actions from section 2. [Please add rows as needed].

Outcome 1.1. Developed the Plan of Universal Access to Electricity of Minimum Cost for Educational Centers and Health Establishments	June 2025
Outcome 1.2. Developed the Universal Access to Electricity Policy for Honduras (PAUEH)	
Outcome 1.3. The Law of Social Electrification for Honduras (LESH) was approved.	
Outcome 2.1. Agreement to introduce Renewable Energy and Energy Efficiency in the curriculum from preschool to high school	June 2025
<b>Outcome 3.1</b> . Technicians trained in energy efficiency, small-scale non-conventional renewable technologies, metering and telemetering, micro-	December 2020
grids and energy management	
<b>Outcome 4.1.</b> New university degrees related to renewable energy.	December 2030
Outcome 4.2. Research to strengthen links between education-skills and the world of work-labor market needs.	
Outcome 5.1. 7,600 public sector educational centers nationwide are electrified	June 2030

# 1 and 2035

2 and 2030

SECTION 4: REQUIRED RESOURCES AND SUPPORT			
4.1. Please specify required finance and investments for each of the actions in section 2.			
1.1 Activity: Recognition of the interrelation between the rights of access to energy and education and its reflection in the development of policies and commitments at the national level and energization of 100% of the country's education centers.	Supplies	Value (USD)	
Electricity for Educational Centers and Health Establishments (PAUECEES).	<ul> <li>Hiring of consulting services for the drafting of laws, plans, policies and other legal instruments.</li> <li>Socialization workshops</li> </ul>	USD \$400,000.00	
<ul> <li>Elaboration of PAUEH policy.</li> <li>Preparation of legal instruments.</li> </ul>			
2.1 Activity: Promote universal access for students at preschool, primary and secondary levels to learning related to responsible use, with equity and inclusion of energy - knowledge, behaviors, and attitudes - with a focus on renewable energy and energy efficiency, that contributes to the achievement of sustainable development: models of production, consumption and	Supplies	Value (USD)	
lifestyles.         - Coordination of meetings to establish an introductory agreement on renewable energy and energy efficiency in the preschool - high school curriculum.         - Design and printing of educational material.		USD \$ 3,000,000.00	
<ul> <li>Coordination of science fairs with a focus on clean energy.</li> <li>Training of teachers, managers, and other educational personnel in vocational and professional orientation with a gender, inclusion, and equity perspective.</li> <li>Creation of a professional course on renewable energies</li> </ul>			
and energy saving technologies. 3.1 Technical training for the formulation, execution, and implementation of small programs for autonomous renewable generation and distributed renewable generation (mainly solar, wind, and biomass, micro-hydro energy).	Supplies	Value (USD)	
- Formulation of training workshops in energy project components.	<ul> <li>Hiring of consultancy for skills training.</li> <li>Food and workshop materials</li> <li>Meeting logistics for alliances</li> </ul>	USD \$10,000.00

Council of Private Enterprise (COHEP),	
ematization, socialization of projects,	

# **SECTION 5: IMPACT**

5.1. Countries planned for implementation including number of people potentially impacted.

Population of the country in universities, educational centers and in the communities where the project is developed.

5.2. Alignment with the 2030 Agenda for Sustainable Development – Please describe how each of the actions from section 2 impact advancing the SDGs by 2030. [up to 500 words, please upload supporting] strategy documents as needed].

The SDG4 objectives are aligned with the actions of promoting new school and university study plans focused on renewable energy, energy efficiency and the environment, as those established in section 2 are focused on contributing directly to improving universal access to modern sources of energy, to increase participation and expanding investment and research in clean energy, focused on SDG 7, taking into account that information is a basic tool for the energy transition in Honduras since it allows the evaluation of the present state and the construction of the vision of the sector energetic. Without complete and reliable information, it is not possible to establish continuous improvement processes that guide the population in the construction of a sustainable behavior in energy consumption. Recognition of the interrelatedness of access rights to energy and education and their reflection in policy development will help improve universal access to modern sources of energy. Similarly, the objective of increasing access to electricity to the country's educational centers with the use of renewable energy is part of the SDG 7 on Affordable and non-polluting energy to expand infrastructure and services in a developing country as is Honduras.

# 5.3. Alignment with Paris Agreement and net-zero by 2050 - Please describe how each of the actions from section 2 align with the Paris Agreement and national NDCs (if applicable) and support the net-zero emissions by 2050. [up to 500 words, please upload supporting strategy documents as needed]

Each of the actions outlined in section 2 are focused on the NDC objective 3 "Promote a fair and adequate energy transition towards the sustainable management of renewable, accessible and affordable energies for the Honduran population, which stimulates economic growth, the improvement of productivity, in harmony with the conservation of natural resources, ensuring the implementation of mechanisms, infrastructure, technological models, policies that promote low-carbon measures and actions for the development of the country's energy sector "by promoting education and training professionalizing students and teachers in renewable energy.

Likewise, they link with the NDC in their objective 5; "Guarantee the adequate and efficient use of energy, in order to conserve and improve practices in responsible energy consumption, reduce costs and promote national economic sustainability, improve the family economy and raise awareness and educate the general population towards energy savings responsible, in order to increase efficiency, develop investments at a technological level and maximize profits through socially viable and economically profitable initiatives".

# **SECTION 6: MONITORING AND REPORTING**

6.1. Please describe how you intend to track the progress of the proposed outcomes in section 3. Please also describe if you intend to use other existing reporting frameworks to track progress on the proposed outcomes.

**Monitoring 1:** Annual Program for the implementation and execution of the Public Policy and the Plan for Universal Access to Minimum Cost Electricity for Educational Centers and Health Establishments (PAUECEES) by the SEN.

**Monitoring 2:** Development of semiannual meetings between the key actors linked to the primary, secondary, and university education sectors led by the Secretariat of State in the Energy Office (SEN), where the strategies for the incorporation of new academic pensum will be evaluated.

Monitoring 3: Quarterly monitoring and evaluation of the scope and results obtained from the personnel trained in the energy project.

Monitoring 4: Annual review reports on progress related to research, prepared by the Academy and shared with the Secretariat of State in the Energy Office (SEN).

Monitoring 5: Semiannual monitoring and evaluation of the construction of electrification projects in educational centers.

# **SECTION 7: GUIDING PRINCIPLES CHECK LIST**

Please use the checklist below to validate that the proposed Energy Compact is aligned with the guiding principles.

Stepping up ambition and accelerating action - Increase contribution of and accelerate the implementation of the SDG7 targets in support of the 2030 Agenda for Sustainable Development for Paris Agreement

I.1 Does the Energy Compact strengthen and/or add a target, commitment, policy, action related to SDG7 and its linkages to the other SDGs that results in a higher cumulative impact compared to existing frameworks? X Yes  $\Box$ No

I.2 Does the Energy Compact increase the geographical and/or sectoral coverage of SDG7 related efforts? X Yes  $\Box$ No

I.3 Does the Energy Compact consider inclusion of key priority issues towards achieving SDG7 by 2030 and the net-zero emission goal of the Paris Agreement by 2050 - as defied by latest global analysis and data including the outcome of the Technical Working Groups? X Yes  $\Box$ No

**II. Alignment with the 2030 agenda on Sustainable Development Goals** – Ensure coherence and alignment with SDG implementation plans and strategies by 2030 as well as national development plans and priorities.

II.1 Has the Energy Compact considered enabling actions of SDG7 to reach the other sustainable development goals by 2030? X Yes  $\Box$ No

II.2 Does the Energy Compact align with national, sectoral, and/or sub-national sustainable development strategies/plans, including SDG implementation plans/roadmaps? X Yes  $\Box$ No II.3 Has the Energy Compact considered a timeframe in line with the Decade of Action? X Yes  $\Box$ No

III. Alignment with Paris Agreement and net-zero by 2050 - Ensure coherence and alignment with the Nationally Determined Contributions, long term net zero emission strategies.

III.1 Has the Energy Compact considered a timeframe in line with the net-zero goal of the Paris Agreement by 2050? X Yes  $\Box$ No

III.2 Has the Energy Compact considered energy-related targets and information in the updated/enhanced NDCs? X Yes 🗇 No

III.3 Has the Energy Compact considered alignment with reaching the net-zero emissions goal set by many countries by 2050? X Yes 🗆 No

**IV. Leaving no one behind, strengthening inclusion, interlinkages, and synergies** - Enabling the achievement of SDGs and just transition by reflecting interlinkages with other SDGs. *IV.1 Does the Energy Compact include socio-economic impacts of measures being considered? X Yes*  $\Box$ No

IV.2 Does the Energy Compact identify steps towards an inclusive, just energy transition? X Yes  $\Box$ No

IV.3 Does the Energy Compact consider measures that address the needs of the most vulnerable groups (e.g. those impacted the most by energy transitions, lack of energy access)? X Yes 🗆 No

V. Feasibility and Robustness - Commitments and measures are technically sound, feasible, and verifiable based a set of objectives with specific performance indicators, baselines, targets and data sources as needed.

V.1 Is the information included in the Energy Compact based on updated quality data and sectoral assessments, with clear and transparent methodologies related to the proposed measures? X Yes  $\Box$ No V.2 Has the Energy Compact considered inclusion of a set of SMART (specific, measurable, achievable, resource-based and time based) objectives? X Yes  $\Box$ No

V.3 Has the Energy Compact considered issues related to means of implementation to ensure feasibility of measures proposed (e.g. cost and financing strategy, technical assistant needs and partnerships, policy and regulatory gaps, data, and technology)? X Yes  $\Box$ No

nable Development for Paris Agreement cumulative impact compared to existing

# **SECTION 8: ENERGY COMPACT GENERAL INFORMATION**

8.1. Title/name of the Energy Compact

## **Energy to Enable Education Goals**

8.2. Lead entity name (for joint Energy Compacts please list all parties and include, in parenthesis, its entity type, using entity type from below)

The leading entity is the Secretariat of State in the Energy Office (SEN), the organizations and entities to assist in the process of compliance with the agreement are the following:

• Government: Secretariat of State in the Office of Natural Resources and Environment (MI AMBIENTE), Secretariat of Education, Secretariat of State in the Office of Finance (SEFIN), ANCILLERIA – Secretariat of Foreign Relations and International Cooperation, SEDH Secretariat of Human Rights, SEDIS Secretariat for Development and Social Inclusion,

• Local government: Municipal Mayors.

• Private Sector: Honduran Council of Private Enterprise (COHEP), APRODERDH - Association of Distributed Renewable Energy Producers of Honduras, BELCO - Bonaco Electric Company, Industrial Equipments, FHIA Honduran Agricultural Research Foundation, Grupo Terra Foundation, FUNDAAHPROCAFE, Grupo "Energías Unidas", IHDER - Honduran Institute of Rural Development, INELEM Inversiones Electricas de la Mosquitia, RECO Roatan Electric Company, UPCO Utila Power Company.

• Civil Society: Fundación Ayuda en Acción

• Academic Institution: Academy and Universities, National Autonomous University of Honduras - UNAH,

• Multilateral / Cooperation Organization: Government of Taiwan, JICA Japan International Cooperation Agency, SICA Central American Integration System.

#### 8.3 Leading entity type

- X Government
- □ Non-Governmental Organizations (NGOs)
- Private Sector

Local/Regional Government
 Civil Society Organization/Youth
 Philantropic Organization

Multilateral Agency/Intergovernmental Organization
 Academic Institution/Scientific Community
 Other relevant actor

8.4. Contact Information: Secretariat of State in the Office of Energy (SEN). External Cooperation Address Mail: dce@sen.hn

8.5. Select the geographical coverage of the Energy Pact

□ Africa □ Asia and the Pacific □ Europe X Latin America and the Caribbean □ North America □ West Asia □ Global

8.6. Please select the Energy Compact thematic focus area(s)

Energy Access Energy Transition X Enabling SDGs through inclusive Energy Transitions Innovation, technology and data Finance and investments.
