

# Israeli solar fields in the West Bank

As of January 2017, Israel operates 4 large-scale commercial solar fields on Palestinian occupied land in the West Bank. Connected to Israel's national grid, these fields electrify Israeli households in settlements and within the Green Line.

## 1. Shadmot Mehola Solar Field

**15,624**  
solar panels

**5MW**

occupies  
**49,242 m<sup>2</sup>**
